

VARUNA - Dynamic AI Traffic Flow Optimizer & Emergency

Project overview

Smart traffic management system for real-time accident detection, congestion analysis, emergency response

Features: - Accident detection using YOLO models; - Smart signal control; - Multi-junction simulation

Requirements: Python 3.8+, Node.js 14+, OpenCV, FastAPI, YOLOv8, React 18

Repository: <https://github.com/Manas239/VARUNA>
